Laint, . delicate beautifier, which smooths out all indentations, furrows, scars, removing tan, freekles, and discolorations from the skin, leaving the complexion clear, brilliant, and beautiful, the skin soft and smooth. With the assistance of this new American trick of a Lady's toilet, temale beauty is destined to play a larger part in the admiration of men and the ambition of women than all the arts employed since her creation. Prof. C. F. Chandler, Chemist to the Metropolitan Board of Health, has recently prepared a chemical analysis of this delightful toilet preparation, and reported that the "Bloom of Youth" was harmless, containing nothing injurious to the health. Ladies need have no fear of using this invaluable toilet apquisition.
